EDUCATION

Amity University Online <i>Master of Computer Applications (MCA) -- Specialization in Cybersecurity</i>	Jul 2026 -- Present <i>India</i>
DAV College, Amritsar <i>Bachelor of Computer Applications (BCA) -- Second Division</i>	Oct 2022 -- Jul 2025 <i>India</i>

EXPERIENCE

Software Developer Intern <i>Growth Flow Media</i>	Aug 2024 -- May 2025 <i>Remote</i>
- Built and maintained responsive UI components in React for client-facing web pages, translating design mockups into pixel-accurate, cross-browser layouts. - Developed reusable component patterns and a consistent styling system with CSS/Tailwind, reducing duplicate code across pages and speeding up new feature delivery. - Integrated REST APIs to fetch and render dynamic content, handling loading, empty, and error states to improve overall user experience.	

PROJECTS

TaskFlow -- Task Management App React, Vite, Tailwind CSS, shadcn/ui, Framer Motion	Mar 2026 -- Apr 2026
- Built a modern task management web app with create/edit/delete, instant search, and a progress-tracking dashboard using React and Vite. - Implemented dark/light mode, local storage persistence, and responsive Framer Motion animations with a shadcn/ui and Tailwind CSS component system.	
JobFit AI -- Resume Analyzer Python, LangChain, Google Gemini, Streamlit	Jan 2026 -- Feb 2026
- Architected a full-stack Generative AI web application scoring resumes against job descriptions using Google Gemini 2.5 and LangChain via semantic matching and ATS keyword analysis. - Deployed on Streamlit Cloud with secure API key management, robust error handling, and advanced prompt engineering replicating ATS scoring logic for actionable candidate feedback.	
Langagraph: Graph & Agent Visualizer HTML5, CSS3, SVG	Dec 2025 -- Jan 2026
- Built an interactive browser-based graph simulation tool generating grid, ring, and star network structures with agent-flow animations using SVG rendering. - Implemented Dijkstra's Shortest Path Algorithm for real-time optimal routing animation within weighted directed graphs.	

TECHNICAL SKILLS

Programming Languages: Python, HTML5, CSS3
Web & Full-Stack Development: React, Next.js, Vite, Tailwind CSS, FastAPI, Git, GitHub
Generative AI & LLMs: LangChain, OpenAI API, Google Gemini API, RAG, Prompt Engineering
Data & Visualization: Pandas, NumPy, Matplotlib
Tools & Platforms: Jupyter Notebook, Streamlit Cloud, Vercel, Postman

CERTIFICATIONS

Artificial Intelligence and Machine Learning -- MITS Academy -- Jul 2025 -- Dec 2025
