SUMMARY

Full-stack developer with a broad programming foundation spanning React/Next.js frontend development, Python backend and data work, and applied Generative AI (LangChain, Google Gemini). Experience building and deploying complete web applications end-to-end, from UI to API integration to production deployment. Currently pursuing an MCA specializing in Cybersecurity. Seeking entry-level Software Developer / Full-Stack roles.

EDUCATION

Amity University Online <i>Master of Computer Applications (MCA) -- Specialization in Cybersecurity</i>	Jul 2026 -- Present <i>India</i>
DAV College, Amritsar <i>Bachelor of Computer Applications (BCA)</i>	Oct 2022 -- Jul 2025 <i>India</i>

PROJECTS

TaskFlow -- Task Management App React, Vite, Tailwind CSS, shadcn/ui, Framer Motion	Mar 2026 -- Apr 2026
- Engineered a full task management workflow (create, edit, delete, instant search, and a progress-tracking dashboard) from scratch using React and Vite. - Designed a persistent dark/light mode system and a reusable shadcn/ui + Tailwind CSS component library, cutting UI rebuild time on new features.	
JobFit AI -- Resume Analyzer Python, LangChain, Google Gemini, Streamlit	Jan 2026 -- Feb 2026
- Architected a full-stack Generative AI application that scores resumes against job descriptions using Google Gemini 2.5 and LangChain, combining semantic matching with ATS keyword analysis. - Engineered the prompt pipeline to replicate real ATS scoring logic, and deployed it on Streamlit Cloud with secure API key handling and production-grade error handling.	
Langagraph: Graph & Agent Visualizer HTML5, CSS3, SVG	Dec 2025 -- Jan 2026
- Built an interactive browser-based graph simulation engine supporting grid, ring, and star network topologies with real-time agent-flow animations, rendered entirely in native SVG. - Implemented Dijkstra's Shortest Path Algorithm from scratch to animate optimal routing in real time across weighted directed graphs.	

TECHNICAL SKILLS

Programming Languages: Python, HTML5, CSS3, SQL
Web & Full-Stack Development: React, Next.js, Vite, Tailwind CSS, FastAPI, Git, GitHub
Generative AI & LLMs: LangChain, OpenAI API, Google Gemini API, RAG, Prompt Engineering
Data & Visualization: Pandas, NumPy, Matplotlib
Tools & Platforms: Jupyter Notebook, Streamlit Cloud, Vercel, Postman

CERTIFICATIONS

Artificial Intelligence and Machine Learning -- MITS Academy -- Jul 2025 -- Dec 2025
